Mr. Drexel Ball
Vice-president,
Claflin College
Orangeburg, South Carolina 29115

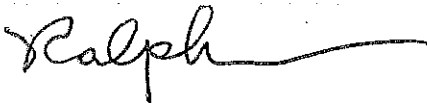

Dear sir,

Here are the drawings for the redesign of the main room in Trustee Hall. The use of both classical and Craftsman styles together work to regularize and augment the main room. It includes pilasters with a very special capital that I have designed especially for this project. It features South Carolina agricultural products including Rice, Indigo, Cotton and sweetgrass basket work.

My work continues on the first floor restrooms, the stair, the entry canopy and improvements to the second floor public areas and the reconfiguration of HVAC and electrical services to accommodate improvements.

Thank you for your very helpful input on this very important project!

Best regards,

A handwritten signature in cursive script that reads "Ralph" followed by a long horizontal flourish.
